Objective

Computer Science undergraduate with strong foundations in Data Structures, Algorithms, and backend development. Seeking a full-time Software Engineer role to build scalable systems and solve complex problems.

Education

Indian Institute of Information Technology Kottayam

B.Tech in Computer Science Engineering (Cyber Security)

Nov. 2022 – Present

Kottayam, Kerala

Technical Skills

Programming Languages: Python, Java, C++, C, SQL, Shell

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, DBMS, Computer Networks

Backend Development: REST API Development, Flask, Django, FastAPI, API Integration, JSON

Databases: MySQL, PostgreSQL, SQLite, CRUD Operations, Query Optimization

Tools & Platforms: Git, GitHub, AWS, Jenkins (CI/CD), VS Code

Web Technologies: HTML, CSS, JavaScript

Problem Solving: Competitive Programming, Algorithm Design, Debugging, Code Optimization

Projects

Phishing Website Detection System | *Python, Scikit-learn, Flask, Pandas*

2025

- Developed a machine learning-based system to detect phishing websites using URL and domain feature extraction techniques. Trained classification models including Random Forest and XGBoost to improve phishing detection accuracy.
- Built a Flask-based interface for real-time phishing URL prediction and backend integration.

Agentic AI Chatbot for Educational Institution | *Python, FastAPI, LangChain, Gemini AI, FAISS*

2025

- Developed an AI-powered chatbot using LangChain and Gemini LLM to answer institution-related queries through agent-based conversational workflows. Implemented RAG using FAISS vector store for semantic document retrieval from custom institutional data.
- Built tool-based automation and enabled structured data collection and storage through FastAPI backend services.

Generative AI Multi-PDF Chatbot | *Python, LangChain, FAISS, Streamlit*

2025

- Designed backend pipelines handling 1000+ document queries with optimized vector search. Implemented CRUD-like workflows for document handling and query responses.
- Exposed backend functionality through API-based interfaces. Focused on clean code, modular design, and backend scalability.

Smart India Hackathon (SIH) | *Machine Learning, Computer Vision*

Sep 2023 – Nov 2023

- Developed a real-time gesture recognition system for assistive communication.
- Focused on low-latency processing and reliability in live usage scenarios.

Certifications

Data Analytics Job Simulation – Deloitte

Cybersecurity Analyst Job Simulation – Tata

Data Visualisation: Empowering Business with Effective Insights – Tata

Business Analytics – Microsoft

Customer Experience (CX) for Business Success – HP Life

Google Analytics – Google Skillshop

Leadership / Extracurricular

Sports Design and Social Media Lead

IIIT Kottayam

Sep 2024 – Sep 2025

Kerala

- Comfortable working in rotational shifts and high-pressure production environments.
- Quick learner with strong ownership mindset for live systems and uptime.
